

Analytics, Course Reserves: Title field is blank

- **Product:** Alma
-

Description

When I create a report in the Analytics subject area "Course reserves", the title field is always blank for non-repository citations.

Resolution

The "Title" field from the "Bibliographic details" dimension indeed only lists repository citations.

Please use "Title" from the "Citation metadata details". It should always list the title for repository citations as well as non-repository citations.
