

## "s+" gets "Bad ! arg selector" response

- **Product:** Aleph
  - **Product Version:** 20, 21, 22, 23
  - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
- 

### Description

The command "s+" command gets the response "Bad ! arg selector"

### Resolution

The "s+" command requires that the library be specified:

```
> s+ usm01  
> s+ usm50
```

You can't do just "s+" by itself.
