

## Should I use bash when I SSH to Voyager server?

- **Product:** Voyager
  - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local
- 

### Question

One of the first things I was told to do upon logging into Voyager via SSH is to enter bash. I'm not sure why, however; is this the correct shell?

### Answer

Voyager runs korn shell (ksh) by default. bash is similar and if it is more comfortable, that can be used in most cases as well.
