

## Are ORCID<sup>s</sup> indexed in Summon?

- **Product:** Summon
  - **Product Version:** All Versions
- 

### Question

Are ORCID<sup>s</sup> indexed in Summon?

### Answer

An [ORCID](#) (Open **R**esearcher and **C**ontributor **ID**) is a persistent digital identifier for researchers.

If the metadata provider provides them in a consistent way, we map and index them. The ORCID<sup>s</sup> do not display in Summon; they are searchable only. To search by ORCID, use the following format, making sure that there is no space between the ID and the colon:

(ORCID:XXXX-XXXX-XXXX-XXXX)
