

ViewIt Code Table fields cannot be customized

- **Product:** Alma
- **Product Version:** June 2018 Release

Description

When saving the **ViewIt Labels** code table (Configuration > Discovery > Labels) you receive an error "The Mandatory field Label value is empty".

Resolution

This table cannot have any empty fields.

If there is an empty label field that you do not wish to specify you can add **NOT_DEFINED** to that field and you will be allowed to save.
