

No vendors found in licensor search

- **Product:** Alma
-

Description

When I try to manually add a license, I am not able to add a vendor in the Licensor section. If I try to search for a vendor, no results appear.

Resolution

You can only select vendors of the type "Licensor".

When you select from your Alma menu Acquisitions -> Vendors and filter by Vendor Type = Licensor, you might see that indeed none of your vendors have this type assigned.

You may open the vendor records and check the box "Licensor", then they will become available for manually edited licenses.
