

## How to activate Captcha in Rosetta

- **Product:** Rosetta
- **Product Version:** 6.0

### Overview

The Captcha feature is being used to protect the website from bots attacks. This article instructs how to activate the Captcha feature in Rosetta producer agent registration (from the deposit module login page).

### Activation Steps

1. Go to: <https://www.google.com/recaptcha>
2. Click “My reCAPTCHA”
3. Choose the type of reCAPTCHA: reCAPTCHA v2
4. Include all domain names you use to access Rosetta
5. Click “Register”:

Register a new site

**Label**

**Choose the type of reCAPTCHA** ?

reCAPTCHA v2  
Validate requests with the “I’m not a robot” checkbox.

Invisible reCAPTCHA  
Validate requests in the background.

reCAPTCHA Android  
Validate requests in your android app.

**Domains**  
(one per line)

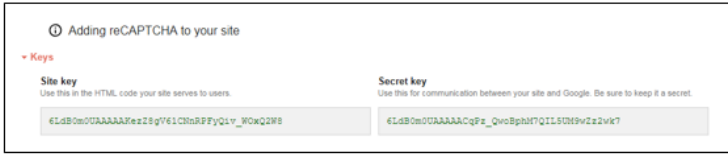

Accept the reCAPTCHA Terms of Service.

By accessing or using the reCAPTCHA APIs, you agree to the Google APIs [Terms of Use](#), Google [Terms of Use](#), and to the Additional Terms below. Please read and understand all applicable terms and policies before accessing the APIs.

Send alerts to owners ?

6. Copy the Site Key and Secret Key generated. Note: these keys are tied to specific domain names.

7. Go to Administration > General Parameters > Select Module: deposit
8. On "reCAPTCHA\_secret\_key" set the Value to the Secret Key.
9. On "reCAPTCHA\_site\_key" set the Value to the Site Key.
10. Click "Update"
11. The Captcha is enabled now for registration in Rosetta, and will show the following:
