

## Save to RefWorks manual installation instructions

### Question

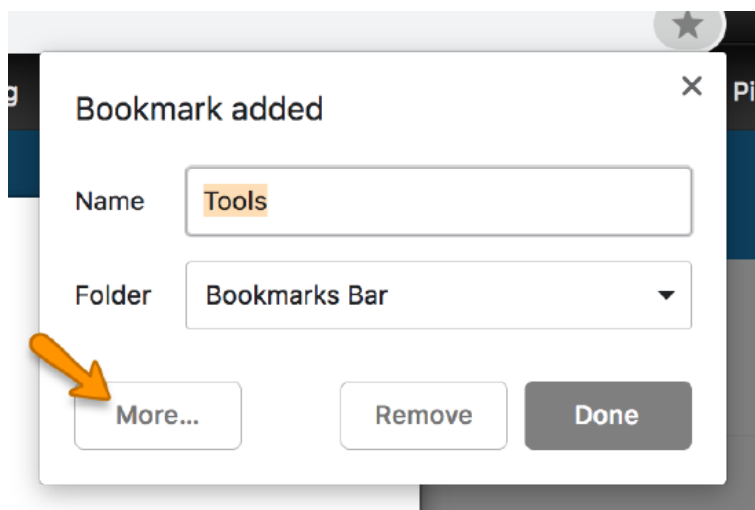

How do I install Save to RefWorks if the drag and drop is not working?

### Answer

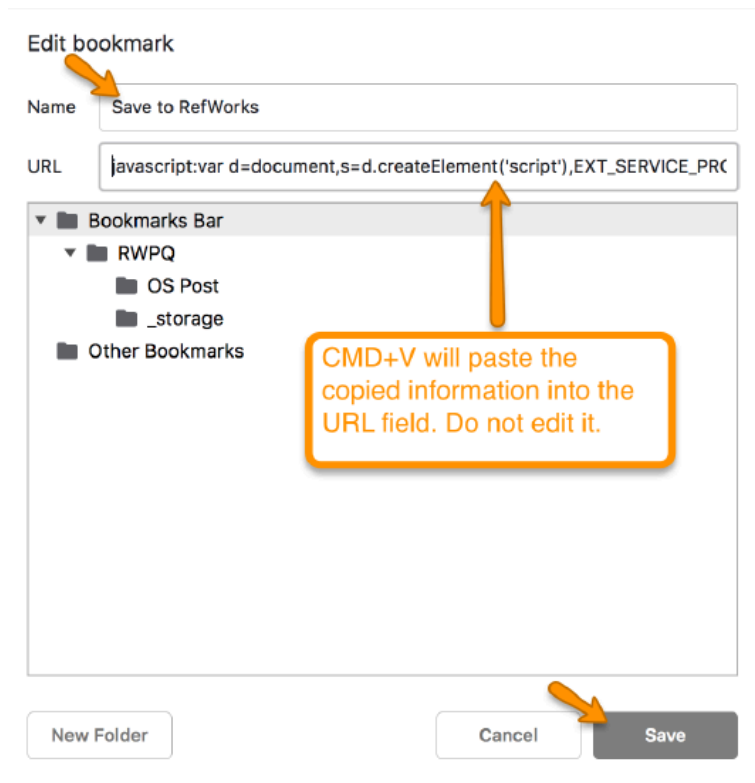

Instead of dragging and dropping the **Save to RefWorks** bookmarklet to the toolbar add it manually. Use **CTRL+click** on the **Save to RefWorks** button shown below to open the alternate menu and copy the link address information.

Next, select **CMD+D** to create a new bookmark and select **More....**

The bookmark name can be edited.

In the URL field, select **CTRL+V** to paste the saved link address from the last step into the field. *Please note the link address information is a simple JavaScript and it should not be edited.* Select **Save** from the bottom of the window.

The **Save to RefWorks** bookmarklet will appear with the name assigned alongside other bookmarks.
