

ILL Lending Requests Loans - Override option is always allowed

- **Product:** Aleph
 - **Product Version:** 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Local, TotalCare
-

Question

When a loan process is handled in the ILL module based on an existing lending (incoming) request and some loan check is triggered, Override option always appears as active. Is it on purpose or is there an option to use `check_circ_override` to control behaviour of Override function, similar as in Circulation module?

Answer

This is how it worked since the new ILL module was developed.

Since the loan in ILL is done to a library and not to a patron, we want to give any ILL staff the option to override those errors.

Therefore, Override option is always active and does not consult `check_circ_override` (as Circulation module does).
