

## Auto renewals for overnight loans

- **Product:** Alma
- 

### Description

We want to set up auto renewals for loans with a due period of several hours or one day. How is this done?

### Resolution

It is not possible to set up auto renewals for such short loans. There is a parameter "auto\_renew\_loan\_days" which is ruling how many days before a due date the auto renewal job is supposed to run. Very short loans are not even loaned when this job runs. It is therefore not possible to set up auto renewals for loans of one day or less.
