

How to write external check program

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Local
-

Description

Is there any documentation available describing how to write external check_doc / fix_doc programs?

Resolution

Yes, see the attached document: [External Programs for Fixing and Checking a Document.pdf](#)

It contains general remarks, input format, output format and errors handling.
