

## New service item-13 requires HOL lines in library relation

- **Product:** Aleph
  - **Product Version:** 23
  - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
- 

New Service "Create Items for Detached Holding Records (item-13)" was added in v 23.2. It creates items from an input file of HOL records for the ADM you're connected to.

In order for item to be created from HOL, this line should be present in `./alephe/tab/library_relation`:

```
HOL ABC50 XYZ60
```

for multi-ADM, line should be repeated for each ADM.
