
Analytics Evidence AGSA6 - Field naming consistency needed

Created By: IGeLU-ELUNA Analytics Working Group
Created on: 1/10/2019

Whenever possible the field name used in Alma should be the field name used in Analytics so that users can have a better understanding of the mapping of the data between the two products. For example, in Alma's electronic resources Platform Name is used and in the Analytics e-inventory subject area Interface Name is used instead. This is very confusing for users.

Priority: High

Ex Libris Response at ELUNA 2018: **Ex Libris is committed to fixing these. They have requested the Analytics WG send specific examples where the field name in Alma is different than the field name in Analytics.**

The Analytics WG welcomes input from Alma Analytics users in getting these resolved. If you notice a field an Alma Analytics that is derived from a field with a different name in Alma please notify us via the [Analytics Working Group ListServ](#)
