## Adding statement of responsibility to Title in Primo VE

Created By: Jamen McGranahan  
Created on: 1/31/2019

The default Title display in Primo VE includes the \$a and \$b, but not the \$c. Our catalogers really wanted this field - known as the Statement of Responsibility - to show on the same line as the Title. To do this, I was able to use a simple normalization rule:

In Alma, under "Discovery" -> "Display Configuration" -> "Manage display and local fields", click "Add field" -> "Add display field" (not local field). You then select Title, which provides the ability to modify the Marc21 normalization rule. I erased what was there and put in the following:

```
rule "Primo VE - Title 245"  
  when  
    MARC."245" has any "a,b,c"  
  then  
    create pnx."display"."title" with MARC."245" sub without sort "a,b,c"  
end
```

Click Save -> Back -> and then "Apply rules" (important to do this - other wise your change will not take effect).
