Duration	5 min.
Description	Leganto Reading List items can be made more available for course students via short term loans on items, potentially moving the items to a separate location designated for course reserves. Short Loans can be enabled via a move request to a temporary location, or by updating the item policy (manually, or by running a job). This session demonstrates the Short Loan workflow starting from the Instructor adding the item in Leganto, and continuing to Library Staff processing the item in Alma.
