

Analytics Evidence BRSA1 - Missing Field Detail in Borrowing Requests SA

Created By: Igelu-Eluna Analytics
Created on: 3/19/2019

Resource sharing request details are missing from the Borrowing Requests SA -- volume, issue, start page, end page, [number of] pages, chapter number, chapter author, chapter title, doi, source, series title number, Borrowing Requests Details > material type (there is a material type field in the Bibliographic Details section in Borrowing; in Lending, this field appears in both details sections).

Use Cases:

- [1] Users need to know what journals are being borrowed from other libraries in order to make appropriate purchasing decisions.
- [2] Pages is needed for reported of work volume. A 3-page scan is not the same as a 50-page scan.
- [3] Pages is needed for calculating fees charged to partners.

Mapping Notes:

Alma Fields	Analytics Fields
Journal title	Borrowing Request Details > Journal Title [NOTE! It is NOT part of the bibliographic details]
Publication date [Year]	Bibliographic Details > Publication Date
Article Title	Bibliographic Details > Title
Article Title + Author	Bibliographic Details > Title Author Combined and Normalized
ISSN and ISBN	Borrowing Request Details > Identifier Bibliographic Details > ISSN and ISBN fields

status: in process
priority: high
subject area: fulfillment; resource sharing; borrowing requests

Ex Libris Response:

Journal title has been added since the initial report, but other fields are still missing.

The missing field list will be updated and this will be reviewed at a future meeting.

An Idea Exchange is recommended.
