
Analytics Evidence PG3 - Join Primo with Alma / Leganto Analytics

Created By: Igelu-Eluna Analytics
Created on: 3/19/2019

There has been much discussion about this topic at user groups. It's good to know this is on the roadmap. It would be good to know delivery timescales.

status: open

priority: medium

subject area: general; leganto; alma

Use case:

Libraries are continually asked to provide comparison data across Discovery layers and Alma.

Providing a link between searches, metadata, acquisitions, patron usage, new signups would allow Libraries to show value for money across platforms.

Links across all data where it is possible would help inform how increased searching may correlate to increased usage.
