

## Electronic Collection Lifecycle = None

- **Product:** Alma
- 

### Description

In Alma Analytics the field "Electronic Collection Lifecycle" (subject area "E-Inventory") is either "In Repository", "Deleted" or "None".

How can it be "None"?

### Resolution

"None" does not refer to a real collection. It is a placeholder for standalone portfolios that are not part of an electronic collection. Here the "Electronic Collection Lifecycle" is displayed as "None".
