[This article was copied from the Voyager Wiki.]

---

### Introduction

This relates to the "New" Tomcat WebVoyage that is included in Voyager 7.0.1 and forward.

We have several databases for our special collections that only display bibliographic records and have no circulation functionality. We needed to remove a lot of the default tab, button and other options as a result, including the Post-Search Filter.

---

### Remove Post-Search Filter Box

You can disable the display of the post-search filters through the CSS. There's already a selector that applies to the filters box in resultsTitles.css, so all you have to do is add one line.

edit: /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/ui/your\_SKIN/css/resultsTitles.css
