[This article was copied from the Voyager Wiki.]

### Introduction

This relates to the "New" Tomcat WebVoyage that is included in Voyager 7.0.1 and forward.

Out of the box the tomcat version of WebVoyage includes a Holdings Jump Bar. You may want to eliminate that Jump Bar.

### Remove Holdings Jump Bar

You will need to edit the webvoyage.properties file found here: /m1/voyager/csmdb/tomcat/vwebv/context/vwebv/ui/en\_US/

### Code Example

Locate the following stanza (this is pasted from our actual edited file) and change the "Y" to "N":

```
#=====
# Links to holdings that allow users to navigate to the desired database display
# when multiple databases possess holdings
#
# Holdings Jump Bar Disabled -- LG
#
#=====
db.holdings.jumpBar=N
db.holdings.jumpBar.text=Held at:
db.holdings.jumpBar.back=Back to library list
```
