December Sneak Peak

The upcoming December release will include features such as:

- Researcher Profile SEO support
- Record Geolocation usage data
- Load assets in batch into Esploro using a DOI list
- New dedicated form for patents
- Links can also be viewed in the Files Viewer
- My Activity Center support for Deposits and Assets
- Patent and Event detail additions to Analytics

All

November Sneak Peak

The October release is an infrastructure release. The following features will be included in the November release:

- Research Portal first release
- Researcher Profiles Search
- Altimetric usage badge on the Researcher Profiles
- Affiliations update from the Researcher Center
- New dedicated forms for creative works performance asset types
- Fields enhancements in the researcher deposit
- ANZSRC codes support in Analytics

November Sneak Peak

The upcoming October release will be an infrastructure release. The following features will be included in the November release:

- Research Portal first release
- Researcher Profiles Search

- Altimetric usage badge on the Researcher Profiles
- Affiliations update from the Researcher Center
- New dedicated forms for creative works performance asset types
- Fields enhancements in the researcher deposit
- ANZSRC codes support in Analytics

September Sneak Peak

The upcoming September release will include features such as:

- An Overview tab on the researcher profiles
- Duplicate researchers report
- Out-of-the-box usage Analytics reports
- Support for migrating content to Esploro using Esploro's schema
- New researcher deposit forms for conferences and presentations
- Enable changing a non-affiliated researcher to an affiliated one
- New search terms and facets

August Sneak Peak

The upcoming August release will include features such as:

- First release of public researcher profiles
- CSV import and export
- Researcher records merges
- Change researcher's displayed name on an asset
- Analytics for asset relations
- Support for local fields
- Support for ERA Fields of Research
- New deposit forms

July Sneak Peak

The upcoming July release will include features such as:

- Enhanced discoverability by Primo and Primo VE
- OAI-PMH publishing
- Generating PDF cover pages
- Changing researcher's displayed name on an asset
- CSV importing
- Bulk editing
- Multiple migration enhancements
- New fields for all asset types
- Enhanced Analytics

Main Features

Setting Researcher's Order Affiliations

December 2019 Management

You can now reorder the list of current and past affiliations by dragging and dropping the relevant organization unit in the affiliations list. The order you configure appears in the researcher's profile.

In order to allow this, the area to add affiliations to researchers was consolidated. There is now one area to add current organization affiliations and one area to add previous organization affiliations. For each area, you can add external and internal affiliations.

Current Affiliations – Internal and External						
	Affiliation	Type	Date started	Position	Title	
1	Harvard University (Cambridge)	External	07/11/2017	Lecturer	-	...
2	Yale University (New Haven)	External	15/11/2018	Lecturer	-	...

Previous Affiliations – Internal and External						
	Affiliation	Type	Date started	Date ended	Position	Title
1.	Columbia University (New York)	External	12/11/2014	01/11/2015	Assistant Professor	-
2.	Cornell University (Ithaca)	External	09/11/2016	31/03/2017	Associate Professor	-

Current and Previous Affiliation Consolidated Lists

Organizational Affiliations

Lecturer, Harvard University (United States, Cambridge)
Lecturer, Yale University (United States, New Haven)

Past Affiliations

Assistant Professor, Columbia University (United States, New York) - CU
Associate Professor, Cornell University (United States, Ithaca) - CU

Affiliations Order in the Researcher Profile

In the future, researchers will be able to set the order directly from their researcher profile.

Recent Entities Enhancements

December 2019 Management

Esploro now supports the display of recent entities being worked on from any place in the research repository, allowing quick access to these entities. This feature currently includes quick access to assets, deposits, and sets that are being worked on.

Recent Entities	
Research Assets	Clear All
Today	
Research Data Dataset	13/11/2019
Research Assets Added	
The Greatest Show Ever Presentation	13/11/2019
Research Assets Added	
The Meaning of Existence Book	13/11/2019
Research Assets Added	

Esploro Recent Entities

In future releases, more Esploro entities will be added to the list.

Patent Asset Type Added to Staff-Mediated Research Output Deposits

December 2019 Management

Esploro now supports depositing Patent type materials. To support this enhancement, **Patent** was added as an asset type for staff-mediated research output deposits.

The screenshot shows a form titled "Asset Information". It contains two fields highlighted with red boxes: "Asset type *" with a dropdown menu showing "Patent: Patent", and "Patent number" with an empty text input field.

Patent Asset Type

When selecting **Patent**, dedicated metadata fields for patents are available to capture this data. This include fields such as: Patent number, Patent agency, Application number, Patent number abbreviation, and Status:

For more information regarding patent deposits, see [Adding Staff-Mediated Research Deposits - Patent](#).

Add Proxy Added to Researcher Details

December 2019 Management

The **Proxies** section was added to the **Research Proxies** tab of the Research Details page (**Research > Researchers > Manage Researchers**). In this section, you can add and view the proxies that can submit assets on behalf of the researcher.

This is in addition to existing **Proxy for** section that lists the researchers for which this researcher can submit assets on their behalf.

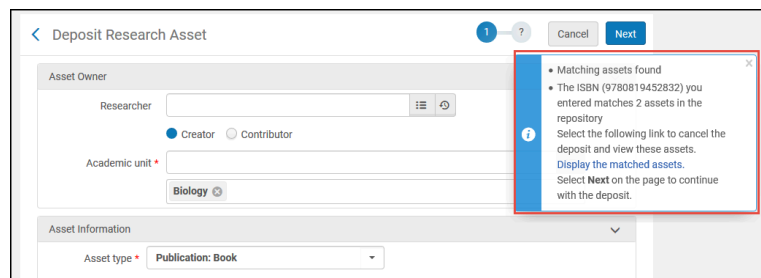

Proxies

Asset Duplication Checks Enhanced to Use ISBN for Books

December 2019 Management

Similar to DOIs for other assets, now if you enter on the first Asset deposit page an ISBN for a book that already exists in Esploro, a warning message is displayed prompting the user to cancel or continue:

Duplicate ISBNs

Added Season Date Support

December 2019 Management

You can now select a season date (for example: 2019 Spring and 2020 First Quarter) when adding the **Date Published** or **Degree Date** to an asset:

Date type *

Published

Choose date *

Choose Season

Look-up or select

Summer

Autumn

Winter

First Quarter

Second Quarter

Third Quarter

Fourth Quarter

Choose Season

The display of the season date will be added in a future release.

Analytics Event Information

December 2019 Analytics

The Asset Conference dimension under the Esploro Research Assets subject area was renamed to Asset Conference/Event and the following event attributes were added: Conference/Event Name, Conference/Event Date, Conference/Event Location, Conference/Event Number, and Event Type. The Asset Conference/Event dimension might include, for example, data about a poster for a conference or event or data about a dance / choreography presented at an event. See [Esploro Research Assets](#) for more information.

Analytics Patent Information

December 2019 Analytics

A new dimension, Asset Patent, was added for patent information under the Esploro Research Assets subject area. The following attributes were added to the Assset Patent dimension: Patent Status, Patent Number, Patent Number Abbreviation, Patent Kind Code, Patent Application Code, Patent Application Number, Patent Agency, and Government Documents Number. Also, related to patents, there are the following new date attributes under the Asset Dates dimension: Asset Application Date, Asset Application Year, Asset Renewed Date, and Asset Renewed Year. See [Esploro Research](#)

[Assets](#) for more information.

Record Usage Geolocation Information

December 2019 Analytics

Esploro now collects usage's geolocation information when a user downloads or views the content of an asset. In the coming releases, it will be possible to make analytics reports based on this information as well as show case it on the research portal. With this geolocation information, you will be able to determine asset usage by country, city, region, and type of organization (business or education institution).

Researcher Center: Proxy Deposit

December 2019 Researcher Center

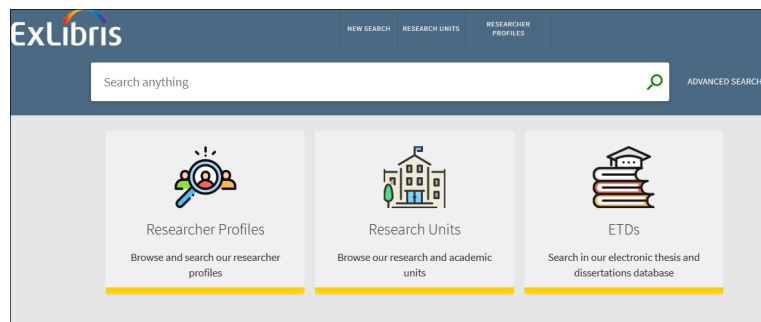

Researcher proxies can log in on behalf of other researchers, manage other researchers' profiles, and deposit research assets for other researchers. See [Managing Researchers](#) for more information.

First Release of the Esploro Research Portal

November 2019 Research Portal

A new public interface for Esploro called the Research Portal is now available. With this interface, institutions can showcase their research outputs and researchers. The Research Portal provides discovery features for accessing researcher public profiles, browsing the institution's research units for their research outputs, providing direct access to the institution's ETD collection and a free text search for the research outputs. Branding, labels and field display customizations are currently available only via Ex Libris. For more information please contact Ex Libris customer support.

From the Research Portal home page, you can enter a simple or advanced search for all resources in the Esploro database or select the Researcher Profiles, Research Units, or ETDs icons to access these new discovery features.

Research Portal Home Page

Simple/Advanced Search. When you select **Advanced Search**, you have additional options for entering your search criteria; and after selecting **Search** to view your results, you can continue to modify your search criteria and filter your results using **Tweak Your Results**.

Title Breast cancer brain metastases the last frontier

Author José Pablo Leone
Bernardo Amadeo Leone

Is Part Of Experimental Hematology & Oncology, Vol.4, p.33

Description Breast cancer is a common cause of brain metastases, with metastases occurring in at least 10-16% of patients. Longer survival of patients with metastatic breast cancer and the use of better imaging techniques are associated with an increased incidence of brain metastases. Unfortunately, patients who develop brain metastases tend to have poor prognosis with short overall survival. In addition, brain metastases are a major cause of morbidity, associated with progressive neurologic deficits that result in a reduced quality of life. Tumor subtypes play a key role in prognosis and treatment selection. Current therapies include surgery, whole-brain radiation therapy, stereotactic radiosurgery, chemotherapy and targeted therapies. However, the timing and appropriate use of these therapies is controversial and careful patient selection by using available prognostic tools is extremely important. This review will focus on current treatment options, novel therapies, future approaches and ongoing clinical trials for patients with breast cancer brain metastases.

First Release of the Researcher Profiles

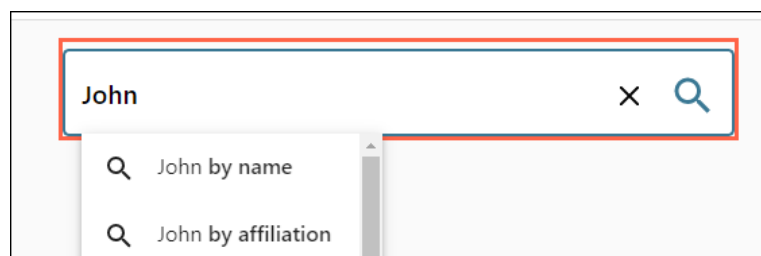

November 2019 Researcher Center

You can now start showcasing your researcher profiles from the Esploro Research Portal, available by selecting researcher Profiles. This first release includes researcher profiles search functionality and the display of individual researcher profile pages with their profile details and research outputs. Further improvements such as facets to filter the search results and additional search options are already planned to be added.

Search Researcher Profiles

You can search by researcher name or affiliation.

Search by Name or Affiliation

The results can be displayed as a list or a table. For each profile, the researcher' academic units and research topics are displayed.

The following is an example of search results as a table:

business management

Page 1 of 21 results

Dominick Webb
Assistant Professor, Business Management School, University of Esploro

Electronic Commerce / International Business / Market Research / Marketing

Expertise
To conduct business overseas, multinational companies need to bridge separate national markets into one global marketplace. There are two macro-scale factors that underline the trend of greater globalization. The first consists of eliminating barriers to make cross-border trade easier (e.g. free flow of goods and services, and capital, referred to as "free trade"). The second is technological change, particularly developments in communication, information processing, and transportation technologies.

Additional Profile Details

View Public Profile from the Managing Researchers page

November 2019 Management

When managing affiliated researcher profiles, there is a new action for viewing the researcher public profile. See [Viewing the Researcher's Public Profile](#) for more information.

Altmetric Badge Displayed for Researcher Profiles

November 2019 Researcher Center

An Altmetric badge is now displayed for research outputs in the research outputs list of a researcher on the Research Profile page. This badge displays the online mentions of the researcher's published research.

Hide Assets from Displaying in a Researcher Public Profile

November 2019 Management

When you edit details for a specific asset, a new option is available to hide the asset from appearing in the public profile of the researcher. You can activate or deactivate the **Display in profile** option in the Creators and Contributors section of the Asset Details page.

Display in Profile

For more information about creators and contributors, see [Adding Staff-Mediated Research Deposits - Generic](#).

ETD Administrator Integration for Depositing ETDs into Esploro

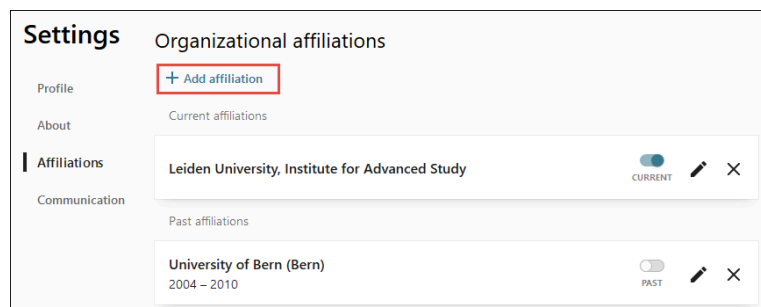

November 2019 Administration

Esploro now supports an integration with [ETD Administrator](#) (using SWORD server) for depositing dissertations and theses into Esploro. Integration is handled by the SWORD Server integration profile. See [Configuring the SWORD Server Integration Profile](#) for instructions. After the profile is created, the primary ETD administrator at your institution needs to contact ETD Administrator technical support and give them the URL, user name, and password. See [Managing Research Assets](#) for more information.

Researcher Center: Managing Affiliations

November 2019 Researcher Center

Researchers can now add affiliations to their researcher profile. To add affiliations, the researcher selects **Settings > Affiliations > Add Affiliation** and enters their organization and department. For past affiliations, they enter the dates that they were affiliated with the institution. They can edit the list of affiliations and mark them as Current or Past.

Add Affiliation

Creative Works Performance Asset Types

November 2019 Management

There is a new dedicated form for entering information about non-written, performance-related creative works. This is available for the following performance asset types: Creative Work: Dance, Creative Work: Drama, Creative Work: Film, Creative Work: Musical performance, and Creative Work: Theater.

The screenshot shows a form titled "Performance details" with a dropdown arrow. The form is organized into two columns of input fields. The left column includes: "Event name" (text input), "Event date" (with "From" and "To" date pickers), "Article number" (text input), "Duration" (text input with an information icon), "Series number" (text input), and "Publication place" (text input). The right column includes: "Event location" (text input), "Event type" (text input), "Language" (dropdown menu), "Audience" (text input), "Series" (text input), and "Publisher" (text input). Below these fields is a section titled "DOI INFORMATION" containing a "DOI" (text input) field.

Performance Details

See [Adding Staff-Mediated Research Deposits - Creative Work - Performance](#) for more information.

ANZSRC Support in Analytics

November 2019 Analytics

The **Asset ANZSRC Codes** dimension was added to the Esploro Research Assets subject area. It includes subject fields related to the Australian and New Zealand Standard Research Classification codes.

Merge and View Researcher Assets

September 2019 Management

The following features were added to manage researchers. For more information, see [Managing Researchers](#).

- On the Find and Manage Researchers page, select **View assets** in the row actions list of a researcher to see all of the assets of that researcher.
- Also on this page, select **Move all assets and grants** to move all assets and grants from a non-affiliated researcher to another researcher. You can optionally delete the non-affiliated researcher at the same time, effectively merging the non-affiliated researcher with the other researcher.

Adding Researcher Proxies

September 2019 Management

You can now add researcher proxies, who can edit a researcher's profile and deposit assets on behalf of that researcher, directly from the Find and Manage Researchers page. Researcher proxies are managed in the same way that researchers are. When editing a researcher proxy, you can convert them to a full researcher (this action cannot be reversed). For more information, see [Managing Researchers](#).

In a future release, we will add the ability for the proxy to log in to the researcher's profile, and for a researcher to designate someone else to be their proxy.

Researcher Center: Overview Tab

September 2019 Researcher Center

A profile now has a new Overview tab that includes details on the researcher, such as expertise, links to other web sites, and current organization affiliations.

The screenshot shows a researcher profile for Albert Einstein. At the top left, there is an "Edit profile" button. Below it is a portrait of Einstein. To the right of the portrait, there are two tabs: "Overview" (selected) and "Output". The "Overview" tab contains the following sections:

- Expertise:** A paragraph describing Einstein's work on reconciling classical mechanics with electromagnetism, leading to special relativity, and his later work on general relativity and quantum theory.
- Link:** A section titled "My Lab Website" with a description: "Under this lab I preform my experiments on gravitational fields and photon theory of light".
- Organizational Affiliations:** Lists "Bern University, Physics and Astronomy".

Below the portrait, the name "Albert Einstein" is displayed, followed by his affiliation "Physics and Astronomy, Bern University". A list of keywords is provided: "Astrophysics | High Energy Astrophysics | Nuclear Astrophysics | Atomic Physics | Nuclear Fusion, Kinetics | Relativity | Theoretical Physics".

Researcher Center: Conference and Presentation Forms

September 2019 Researcher Center

In the Researcher Center, specific forms are now available when submitting any Conference or Presentation type asset.

The screenshot shows a form titled "Event Information" with a navigation bar at the top containing "THE ESSENTIALS", "DESCRIBE IT", "SPECIFY" (highlighted), and "RELATIONS". A "Skip to end" link is also present. The form fields are:

- Event Information:**
 - Name of Event
 - Event Type
 - Event Location
 - From Date (with a calendar icon) → To Date (with a calendar icon)
 - Example: ex. 6/8/2019
- Presentation:**
 - Audience
 - Pages
- Got a DOI?**
 - Enter DOI number

Locate Potentially Duplicated Researchers

September 2019 Management

Non-affiliated researchers can be added to Esploro by several means, and they may be changed to affiliated researchers. You can now check for potentially duplicate researchers. You can now do so by running a job that checks this. See [Checking for Duplicate Researchers](#).

Duplicate Researchers Job Report

Importing Research Assets in Esploro XML Format

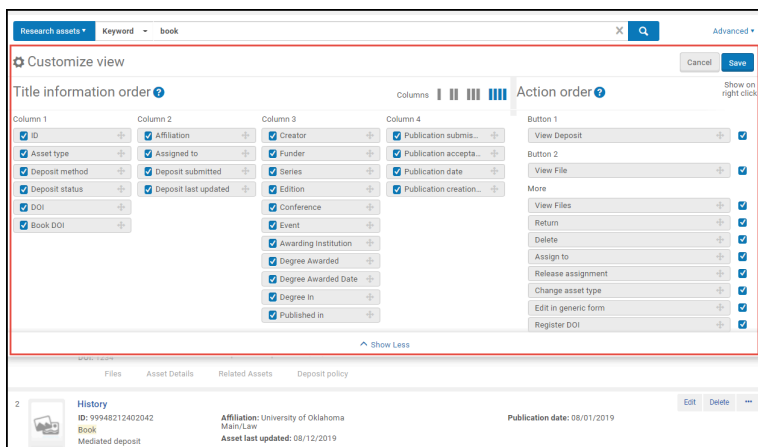

September 2019 Management

You can now import research assets in a custom Esploro XML format. For information about the format, contact Ex Libris customer support.

Additional Fields on Research Assets Search Results Page

September 2019 Management

Many additional fields appear, or are available to appear, on the Research Assets page (search results). You can see all available fields when configuring the page appearance (see [Configure Record List Appearance](#)).

Research Assets Page - Customize View

Researcher Center: Profile

Poster and Webinar Asset Types

September 2019 Management

Asset types **Conference > Poster** and **Interactive Resource > Webinar** were added.

Research Assets Analytics Enhancements

September 2019 Analytics

The following out-of-the-box Analytics reports were added for Research Assets Usage:

- Assets Accessed in the Last 30 days
- Assets not Accessed
- Assets with Access Denied Requests
- File Views and Downloads per File
- File Views and Downloads per IP Location
- Top 10 Popular Assets
- Top 10 Popular Files
- Usage per Asset Category and Type
- Usage per Usage Date

In addition, the Research Assets Usage Dashboard was added.

Researcher Center: Updated Profile

August 2019 Researcher Center

In the Researcher Center, the main page now includes a new left pane alongside the research outputs list with the user's profile picture, name, organization affiliation, and research subject topics.

The screenshot displays a researcher profile for Albert Einstein. On the left, there is a profile picture of Einstein, his name, and his affiliation: "Physics and Astronomy, University of Bern". Below this, a list of research topics is shown: "Astrophysics | Atomic Physics | Nuclear Fusion, Kinetics | Relativity | Theoretical Physics". On the right, under the heading "Output", there is a list of four publications. The first three are journal articles by Einstein, with titles in German: "Ist die Trägheit eines Körpers von seinem Energieinhalt abhängig?", "Zur Elektrodynamik bewegter Körper", and "Über die von der molekularkinetischen Theorie der Wärme geforderte Bewegung von in ruhenden Flüssigkeiten suspendierten Teilchen". Each article entry includes the author's name and the journal title "Annalen der Physik". There is also a "+ ADD WORK" button.

Researcher Center: Updated Profile

Public Profiles (First Release)

August 2019 Researcher Center

You can now view the first release of Esploro's public-facing profiles. This first release includes a profile picture, basic

researcher information, and the list of approved outputs of the researcher. Additional features will be available in upcoming releases.

Currently, there is no way to access these profiles from the Researcher Center or Esploro administrator user interface. For more information on how to view public-facing profiles, contact Ex Libris.

	Local Field Names	<ul style="list-style-type: none"> Five locally defined fields. When configured by your library, you can enter 1-5 fields of free text information relevant to the asset. Use these fields to enter additional information not available in any of the other sections.

Degree Program Codes

August 2019 Administration

A new degree program field (**Degree In**) was added to the ETD forms. You can configure the degree program values that appear when adding or editing an ETD. See [Configuring ETD Degree Programs](#). Also see [New Asset Fields](#), above.

Deposits for Academic Units

August 2019 Management

When creating a staff-mediated research deposit, you must now add the organization academic unit on the first page of the wizard. In addition, you are no longer required to enter a researcher on this page. This enables adding assets only to an academic unit and not to a certain researcher.

Deposit Research Asset

External ETDs

August 2019 Management

You can now add external ETDs, which are ETDs that were awarded to a researcher by an institution other than the local

one. The first step in creating a staff-mediated ETD deposit now offers you a selection between adding a local ETD (awarded by the institution, or an external ETD.

Deposit ETD, First Page of the Wizard

For external ETDs, select a researcher. You cannot create a researcher at this point.

Deposit Research Asset

The form for entering information for an external ETD is slightly different from the one for entering information for a local ETD. See [Adding Staff-Mediated Research Deposits - External ETD](#).

Exporting / Importing Assets To / From a CSV File

August 2019 Management

You can now export or import research asset metadata to or from a CSV file.

To export assets to a CSV file, run the **Research assets export** job on the Run a Job page. See [Running Manual Jobs on Defined Sets](#).

Note that creators and contributors, files, grants, and related assets (containing journal or book) are currently not included in the export. These will be added in a future release.

To import assets to a CSV file, select **CSV** as **Originating System** when configuring an import file. See [Adding Research Assets in Bulk](#).

Creators and contributors, files, links, grants, and related assets (containing journal or book) can be included in the import file.

See [here](#) for information about the file. To create an initial CSV file (with the asset metadata only), export a set of assets and use the file as a template to create an import file.

Author Matching Report

August 2019 Management

Running an import profile now produces a second report: author matching report. This report lists each matched author and his or her associated assets. To view this report, on the Import Profiles (Esploro) page, select **History** in the row actions list of the profile and select **Author matching (by authors)** in the row actions list of the run whose report you want to view. See [Viewing the Research Import Profile Reports](#).

Author Matching Report

ANZSRC Research Codes

August 2019 Management

For institutions in the Australia / New Zealand region, Ex Libris can enable the Australia and New Zealand Standard Research Classification (ANZSRC) in place of the default list of research topics. When enabled, you can assign percentages to ANZSRC Fields of Research (FoR) and ANZSRC Socio-Economic Objectives (SEO), and you can select the type of activity (pure basic research, strategic basic research, applied research, or experimental development) when creating or editing a deposit or asset.

ANZSRC classification Codes

ANZSC Classification Codes Section

Local Fields

August 2019 Administration

You can configure up to five local fields that appear when adding or editing all deposits/assets. See [Configuring Local Asset Fields](#). Also see [New Asset Fields](#), above.

New Analytics Relations Dimension

August 2019 Analytics

Asset Relations is a new dimension in the **Esploro Research Assets** subject area in Analytics. This dimension enables you to create reports to answer questions such as: How many articles do I have that are associated with a dataset? How many datasets are missing relations? The fields in **Asset Relations** are:

- Related Asset Category
- Related Asset Type
- Related Asset DOI
- Related Asset Title
- Related Asset ID
- External Relation URL
- Relation Category
- Relation Type
- Relation Create Date

In addition, the **Has Relations** field was added to Esploro Research Assets > Asset Details. This field indicates if the asset has relationships with other assets.

Enhancements to Author Matching

July 2019 Management

- When importing assets, Esploro now tries to match non-affiliated authors to existing non-affiliated authors, creators, and contributors.
- Author matching, for both affiliated and non-affiliated researchers, was improved during migration and manual deposit.

Asset Normalization

July 2019 Administration / Management

Asset normalization is a rich and complex feature that enables users to change the data in a set of assets in bulk.

The feature currently includes the following parts.

1. **Create sets of assets.** This was added in previous releases.
2. **Create normalization rules.** Each rule defines a series of matches when processing an asset and how to change the matching texts. A single normalization rule can contain multiple transformation rules. To create these rules, you must use Alma's Metadata (MD) Editor.
3. **Create normalization processes.** Each process defines a series of normalization rules to apply in order. Each process also creates a job that you can manually run.
4. **Run the defined normalization job(s)** on any defined set(s).

For more information, see [Asset Normalization](#).

The transformation rules syntax is not fully finalized. Only basic examples appear in the documentation. More information and enhancements will be added (to Esploro and to the documentation) over the coming months. For assistance in building the transformation rules, contact Ex Libris.

Enhancements for Displaying Research Assets in Primo / Primo VE

July 2019 Discovery

Research assets can now be made available in Primo VE environments, in addition to Primo. Furthermore, several enhancements were made to how research assets appear in Primo / Primo VE, including the addition of links, icons,

descriptions, file/link content type, licenses, and access rights.

The screenshot shows a Primo search results page for the book "Mesoporous Silica-based Nanomaterials and Biomedical Applications, Part A" by Fuyuhiko Tamanoi (2018). The page includes a sidebar with navigation options: TOP, SEND TO, VIEW IT, DETAILS, GET IT, and TAGS. The "SEND TO" section contains icons for EXPORT BIBTEX, EXPORT RIS, REFWORKS, ENDNOTE, EASYBIB, CITATION, PERMALINK, PRINT, and E-MAIL. The "VIEW IT" section features a yellow banner with "Sign-in for more options" and a "Sign in" button. Below this, the "File/s" section lists three items: "bookChapter-maxwell.pdf" (2.15 MB, CC BY-NC-ND V4.0, Open Access), "some data.txt" (2.75 KB, CC0 V1.0, Open Access), and "AddDepositWithDOIManually (1).zip" (2.76 MB, CC BY-NC-ND V4.0, Open Access). The "Link/s" section includes a "Publisher's version" link.

Research Assets in Primo

Cover Page for Exported PDFs

July 2019 Administration

You can now configure a cover for exported PDFs on the PDF Cover Page Configuration page. See [Configuring PDF Cover Pages](#).

Change Asset Type

July 2019 Management

You can now change the asset type of an asset (not an ETD). Select **Change asset type** in the row actions list on the Research Assets page and select the new type in the Change Asset Type pane. See [Managing Research Assets](#).

Change Asset Type Pane

When you change an asset type, some fields may not appear when you edit or view the asset if these fields are not relevant to the new type. Nevertheless, these fields are retained in the asset's metadata. You can view and/or edit these fields in the generic form. The generic form now contains all areas and options that may appear in all other forms (which are specific to certain asset types). All link and file types, licenses, and relationships appear on this form.

To edit the asset in the generic form, select **Edit in generic form** in the row actions list.

As part of this feature, the **Other description / comments** field was removed from the **Description and Topics** section and a **Comments** section was added to all forms. Some other field names were slightly changed or moved position.

Asset Grants Analytics Dimension

July 2019 Analytics

The Asset Grants dimension was added to the Esploro Research Assets subject area. It allows you to create reports concerning asset grants. For more information, see [Esploro Research Assets](#).

Asset Copyright Enhancements

July 2019 Management

A new free text field, **Copyright statement**, appears in the **Access Rights and Licenses** section when adding or editing any access type other than ETD.

Access Rights and License

Copyright date was added as a date type in the **Statuses and Dates** section. In addition, **Rights Holder** was added as an out-of-the-box contributor type; see [Configuring Contributor Types](#).

Edit the Creator or Contributor Affiliation and Name on an Asset

July 2019 Management

When editing a creator or contributor in an asset, you can now choose or create a name variant to appear in the asset instead of the preferred name. You can also add a pre-defined internal or external affiliation from this pane.

Edit creator

Drop files here, or browse.

Files Section

New Asset Type: Accepted Manuscript

July 2019 Management

Posted Content > Accepted Manuscript was added as a new asset type.

Updating the DOI Agency with Asset Changes

June 2019 Administration

The new job, Update DOI Registration Agency - Research Assets, updates DOI agencies with any changes to assets. For more information, see [Viewing Scheduled Jobs](#) in the Alma documentation.

Enhancements to Importing Research Assets

June 2019 Administration / Management

Several new features were added to support importing research assets:

- When importing assets, Esploro tries to match assets to existing ones and overlays them, and, in addition, tries to match authors to existing authors, creators, and contributors and match them. The process for how this is done is currently internal, but will be configurable in the future.
- A report is now produced after running the import profile. The report includes the number of imported assets, including how many were matched at varying levels of certainty. For some result rows, you can select row actions to view the list of assets that match the result, create a set out of these assets, or download this list of assets to an XML file. For more information, see [Viewing the Research Import Profile Report](#).

Job Report

Metadata Import: Digital commons - OAI - pub

Process ID: 219174390000301
 Started on: 30/04/2019 10:51:56 AM IDT

Completed: 01/05/2019 10:01:51 AM IDT
 Total run time: 23 Hours 9 Minutes 55 Seconds

Successfully: Completed Successfully
 Status date: 01/05/2019 10:01:51 AM IDT

Files Processed: 132
 Records with exceptions: 0

Total records imported	6547
Total records not imported	10

Assets Matched

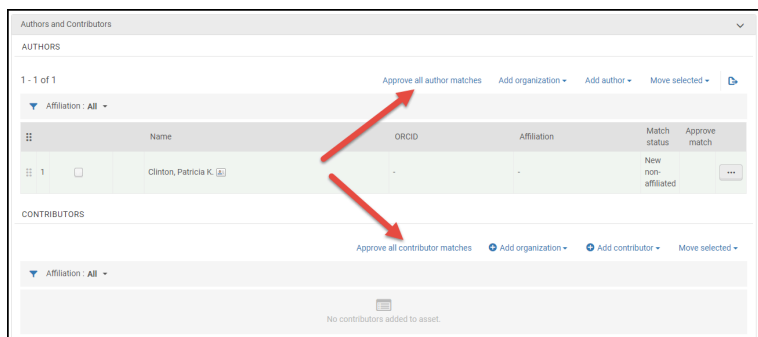

Authors Matched

	Count
1 Number of authors matched - Strong match	74
2 Number of authors matched - Uncertain match	55
3 Number of authors matched - New Non-Affiliated	112
4 Assets with uncertain matches	3670
5 Assets with only strong author matches	1165
6 Assets with one or more new non-affiliated authors	2825
7 Assets with only new non-affiliated authors	461

- When editing an imported asset, you can select to approve authors / creators / contributors one at a time or all at once. To support this, two additional fields appear for each person associated with any asset (all assets, not just imported ones):
 - Match status** – The certainty of the match, assigned by the import process, or **Approved** for persons who were manually entered or approved.
 - Approve match** – For imported assets, a toggle switch appears in this column for each person.

To approve persons for the asset:

- To approve a single person match, indicate this in the **Approve match** column.
- To match all persons in the pane, select **Approve all author matches** / **Approve all creators matches** / **Approve all contributor matches**, according to the relevant pane.

- You can select whether the Update DOI Registration Agency - Research Assets job updates the DOI registration agencies with the imported assets that hold DOIs that were registered by your institution. When selected, this updates the agencies with these assets' metadata and also updates these assets' URLs in the agencies to resolve back to Esploro. See [Configuring DOI Agencies](#).

Researcher Center: Reserve a DOI

Researcher Center: Manage Links

June 2019 Researcher Center

Researchers can now manage their links in the **Settings > About** area of the Researcher Center.

Researcher Center: Manage Links

For each link, you must add a title and URL, and can add a description. You can edit and delete links.

New Esploro Research Asset Usage Analytics Subject Area

June 2019 Analytics

The Esploro Research Asset Usage Analytics subject area is now available. With the fields of this subject area, you can create analytics reports that describe the usage of your institution's research assets.

For more information, see [Esploro Research Assets Usage](#).

Additional Enhancements

- **December 2019 Management**

You can now reorder the list of asset links by dragging and dropping, as is possible with the asset files. The order you configure controls the display order of the links in the asset's page on the research portal.

Open Access Rights Label

- December 2019 Management**

On the Sub-units tab of the Organization Academic Unit Details page (**Research > Manage Organizations > Organization Academic Units**), the Status filter now includes the **All** option. When the All filter is selected, both Active and Inactive statuses appear in the Status column on the Sub-units tab. See [Managing Organizations](#) for more information.

Sub-Units Tab Status Filter

- December 2019 Administration**

The **Closed for All** and **Restricted for All** local access rights rules options were removed from the local Access Rights configuration (**Configuration Menu > Research > Access Rights and Licenses > Access Rights**). The Closed and Restricted access rights provided out of the box (OTB) under the Access Rights configuration provide the same capability.

- November 2019 Management**

The functions for managing (configuring) internal and external organization units moved from the configuration menu (**Configuration Menu > Research > Organization > Organization Academic Units** and **Configuration > Research > Organization > External Research Organizations**) to the Research main menu (**Research > Manage Organizations > Organization Academic Units** and **Research > Manage Organizations > External Research Organizations**).

With this change, a new role, **Manage organizations**, is required to access these functions. In addition to this new role, the new Manage External Organizations privilege was added to the Research Assets Manager and Curator roles for accessing the External Research Organizations menu option (**Research > Manage Organizations > External Research Organizations**).

For more information, see [Managing Organizations](#) and [Esploro User Roles](#).

- November 2019 Management**

Fields populated by the researcher loader can no longer be updated by the researcher. This is to prevent the user updating fields manually only to have them overwritten when the institution reloads the researcher data. To update the

loaded personal information, the researcher must contact the system administrator.

- **November 2019 Management**

A new **Access to Researcher Center** setting was added to control whether an affiliated researcher can access the Researcher Center (**Research > Researchers > Manage Researchers**). This setting is configured for each researcher separately and can be set in bulk using the Researcher Loader.

The screenshot shows a 'Researcher Settings' form with three rows of settings, each with 'Yes' and 'No' radio buttons. The 'Access to Researcher Center' setting is highlighted with a red box and has the 'Yes' radio button selected.

Researcher Settings					
Active Portal Profile:	<input checked="" type="radio"/> Yes <input type="radio"/> No	Include in Automatic Capture:	<input checked="" type="radio"/> Yes <input type="radio"/> No	Access to Researcher Center:	<input checked="" type="radio"/> Yes <input type="radio"/> No

Access to Researcher Center

- **November 2019 Management**

On the Assets Management page, it is now possible to sort the results list according to asset date. See [Managing Research Assets](#) for more information.

- **November 2019 Management**

The Book Review asset type has now changed to Review allowing this asset type to include other review types of research output. See [Esploro Overview](#) for more information.

- **November 2019 Management**

While adding or editing a researcher's affiliation on the researcher page through [Managing Researchers](#), it is now possible to add the title of the researcher in the associated affiliation in addition to his position. The title is a free text field.

Edit Affiliation

- **November 2019 Researcher Center**

Past Affiliations now appear in researcher profiles. To display past affiliations, select the new **Show Past Affiliations** link.

The screenshot shows a researcher profile for Albert Einstein. It includes a profile picture, a name, and current affiliation. The 'Organizational Affiliations' section is visible, showing 'Leiden University, Institute for Advanced Study' and a link to 'Show past affiliations'.

- **September 2019 Analytics**
The **Asset Authors List with Primary Identifier** field was added to Esploro Research Assets > Asset Details. It displays the authors of the assets with their primary identifier.
- **September 2019 Management**
Email notifications are now sent to all affiliated researchers associated with an asset, not only the one that made the deposit.
- **September 2019 Management**
When adding a staff-mediated deposit, text now appear on the page to indicate that a date is mandatory.
- **September 2019 Management**
When a DOI is reserved, this is noted in the Alma viewer.
- **September 2019 Discovery**
In Primo VE, you can now search and filter by academic unit.
- **September 2019 Management**
Esploro now supplements the data in imported research assets with journal information from the Alma Community Zone, if the asset has an ISSN.
- **September 2019 Management**
The labels "File Type" and "Link Type" were changed to "Content Type" when adding or editing files and/or links in assets.
- **September 2019 Management**
Local Field 1-5 were added as fields to the simple and advanced persistent search.
- **September 2019 Management**
Additional fields are available in the **Researcher Settings** area when adding or editing a researcher: whether the researcher has a public profile, whether the researcher's assets are captures in automatic capture (for future use), and

whether the research can log in to the Researcher Center (for future use).

- **September 2019 Discovery**

In Primo VE, Creation Date now displays one of the following dates, in priority order: DATE_DEGREE, DATE_PUBLISHED, DATE_EPUBLISHED, DATE_COPYRIGHTED, DATE_POSTED, DATE_AVAILABLE, DATE_PRESENTED, DATE_VALID, DATE_ISSUED, DATE_APPROVED, DATE_ACCEPTED, DATE_DEFENSE, DATE_SUBMITTED, DATE_COMPLETED, DATE_CREATED, DATE_COLLECTED, DATE_OTHER, DATE_UPDATED.

- **September 2019 Administration**

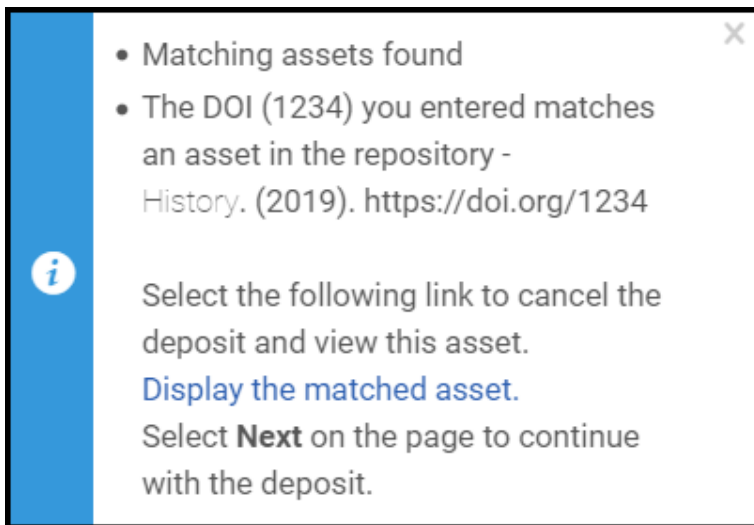

Many more relationships were added to the Asset to Asset Relationship List. The new relationships are not available (hidden) by default. See [Configuring Asset to Asset Relationships](#) for information on how to configure these relationships.

- **September 2019 Management**

ANZ fields were added to the simple and advanced persistent search for research assets.

- **September 2019 Management**

The message that appears when an asset with a duplicated DOI is detected was changed. It now includes a link to cancel the current action and open the matching asset.

Duplicate DOI Message

- **September 2019 Administration**

Additional out-of-the-box values were added to the Creator/Contributor Role Mapping table. See [Configuring Contributor Types](#).

- **September 2019 Management**

The import profile option **CSV** for **Originating System** was changed to **Esploro**. After selecting **Esploro**, you can select either **CSV** or **XML** for **Physical Source Format**. For more information, see [Adding Research Assets in Bulk](#).

- **September 2019 Management**

ASSET_RESSUBTYPE, **ASSET_PMCID**, and **ASSET_VOLNUM** were added as fields in the CSV import file.

- **August 2019 Administration**

You can now deactivate or re-activate research organization sub-units. Disabled sub-units cannot be associated with assets or researchers, but they continue to appear with any assets or researchers with which they are already associated. On the sub-units tab, you can filter the list of sub-units by **Active** or **Deactivated**. See [Configuring Research Organization Units](#).

- **August 2019 Researcher Center**

In the Researcher Center, a confirmation dialog box now appears when deleting a draft.

- **August 2019 Management**

Several events that occur to the deposit appear as notes in the research deposit / asset. The new ones that appear include submitted, under review, returned, resubmitted, and approved.

- **August 2019 Management**

Just like you can select a type for an asset contributor, you can now select a type for an asset author or creator.

- **August 2019 Administration**

You can now add a relevant URI when adding or editing an access rights policy. See [Configuring Esploro Access Rights](#).

- **August 2019 Manager**

For an internal ETD, it is now possible to link the ETD to an affiliated researcher, and not just add a student author name as metadata only. When viewing the list of assets or deposits, you can select **Link ETD to a researcher** to link an affiliated researcher to the ETD. If the ETD is already linked to a researcher, you can select **Unlink ETD to a researcher**.

- **August 2019 Management**

User identifiers Wikidata and VIAF were added.

- **August 2019 Administration**

If you require a re-index of research assets, run the new manual job, **Index Research Assets**, on the Run a Job page to push a set of assets to Primo VE. See [Running a Manual Job on Defined Sets](#).

- **August 2019 Administration**

When configuring the PDF cover page, 1) you can configure the text that appears when there are too many authors, and 2) you now select **Upload Repository Logo** in order to upload the logo. As a result of this second change, you can generate the test page after uploading a logo without having to re-display the page.

- **August 2019 Administration**

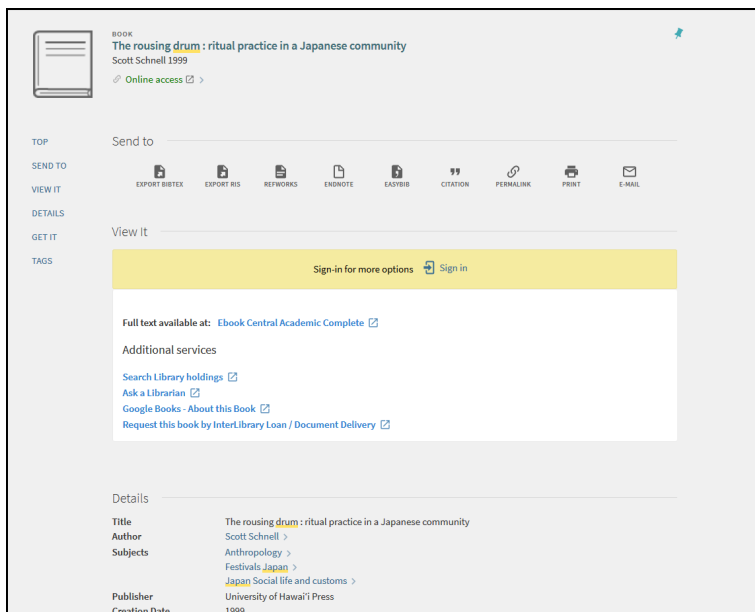

treatise was added as an ETD project type.

- **August 2019 Management**

Author and **Publication name** fields are now also searched when performing a **Research Assets > Keywords** search.

- **August 2019 Discovery**

In Primo, when an asset has no links or files, an OpenURL link now appears. Select the link to try to find full text availability.

Esploro in Primo

- **August 2019 Management**

The fields to add a name variant now appear by default when editing a contributor or creator.

Edit Creator Pane

- **July 2019 Analytics**

The following fields were added to the Esploro Research Assets Usage subject area:

- **Last Date of Access** to Asset Usage Measures
- **Request IP** to Asset Usage Details
- **Requester Type** to Asset Usage Details

- **July 2019 Management**

Authors and creators now appear in the list of search results when searching for assets.

- **July 2019 Management**

When adding or editing an asset, adding an organization creator/contributor was changed to enable you to add any kind of group creator/contributor. A group can be any kind of group with a name, such as "AHA Heart Failure Taskforce", or any other kind of organization or institution credited with the authorship or contribution. You can enter free text, and do not have to select from an existing organization, internal or external. No match is made between the text you enter and an existing organization, internal or external.

- **July 2019 Administration**

You can now have your DOI profile point to the agency's test environment when you want to test the profile. You cannot migrate DOIs in a production environment when this profile points to the test environment. See [Configuring DOI Agencies](#).

- **July 2019 Administration**

The identifier **LCNAF** (Library of Congress Name Authority File Number) was added to the User Identifier Types code table. For more information, see [Configuring User Identifier Types](#) in the Alma documentation.

- **July 2019 Management**

Metadata for all asset types now appears in the Alma viewer (when viewing an asset's files).

- **July 2019 Management**

Several out-of-the-box file/link types were added to the Asset File and Link Types List table; see [Configuring Research Asset File and Link Types](#).

- **July 2019 Administration**

In the Crossref Details page, the labels for registration name, email, and account ID fields now include the terms used by Crossref; see [Configuring DOI Agencies](#).

- **July 2019 Management**

A new free text field, **Grant Note**, appears in the **Grants** section when adding or editing an asset. The grant name is no longer mandatory (just the ID).

- **July 2019 Management**

Degree grantor was added as a field to the ETD deposit form. Use this field if the unit granting the degree is different from the unit under which the work is affiliated. In addition, **Publisher** was added to the ETD deposit form.

- **July 2019 Management**

The asset type **Conference paper/presentation** was split into two types. The asset type **Conference abstract** was removed.

- **July 2019 Administration**
New asset to asset relationships were added; see [Configuring Asset to Asset Relationships](#).
- **July 2019 Administration**
The configuration menu **Researcher Portal** was changed to **Researcher Center**.
- **July 2019 Management**
When replacing a creator in an asset, you can now also add a non-affiliated researcher.
- **July 2019 Administration**
(ETD) Project Types and ETD Degree Names configuration links were moved from the Deposits configuration area to the Asset Details configuration area.
- **July 2019 Management**
Esploro now extracts and stores an asset file's MIME type.
- **June 2019 Researcher Center**
The Researcher Center now auto-saves values entered by the researcher in assets every few seconds. Therefore, if the researcher closes the browser or otherwise interrupts his or her session, these values and any other changes (up to a few seconds before the interruption) are saved.
- **June 2019 Analytics**
The **Publisher** field was added for Esploro Analytics to **Esploro Research Assets > Asset Details**.
- **June 2019 Management**
In the Asset Details pages, author, contributor, and creator names now appear in a single column with a researcher information icon containing the researcher name and affiliation.
- **June 2019 Management**
The ability to delete research assets or deposits is now limited to users with the Research Assets Manager role.
- **June 2019 Management**
Profile images uploaded by a researcher appear in the researcher's **Attachment** tab. Deleting a profile image from this tab does not remove the image, it only deletes it from this tab.
- **June 2019 Administration**
Additional labels for Researcher Center settings can now be configured. See [Configuring Researcher Center](#).
- **June 2019 Management**
Publication Year and **File Extension** was added to the facets on the Research Assets page. **File Extension** was added as a search index for simple and advanced searches for research assets. In addition, when searching for research assets using **Keywords**, **File Extension** is one of the fields searched.
- **June 2019 Researcher Center**
You can now manage a name suffix when managing your name.
- **June 2019 Management**
pref_name_suffix was added to the schema when uploading researchers; see [Student Information Systems](#) in the Alma documentation. In addition, when searching for researchers using **All**, **Name Suffix** is one of the fields searched. From July, the researcher's name suffix will appear in all locations that the researcher's name appears in Esploro.
- **June 2019 Management**
When adding or editing researcher website URLs, you can now add an optional website title and description. See [Managing Researchers](#).
- **June 2019 Management**
Availability date is now an option when adding a date in the **Statuses and Dates** section of an asset.
- **June 2019 Administration**
Some out-of-the-box types were added and some names clarified on the Asset File and Link Types List. See [Configuring Research Asset File and Link Types](#).
- **June 2019 Discovery**
In Primo / Primo VE, a user accessing a file that cannot be displayed due to access rights now sees a relevant error message.
- **June 2019 Management**
When displaying a file in the Alma Viewer, organization units now appear as creators and contributors where relevant.

Resolved Issues

- **December 2019 Management**
If you delete a **proxy for** and then add it again, an error message appears. This was fixed.
- **December 2019 Management**
The **View Assets** action appears for proxies that are not researchers. This was fixed.
- **December 2019 Management**
Searching for researchers by their full name did not work. This was fixed.
- **December 2019 Management**
Searching for researchers with a hyphen in their name did not work properly. This was fixed.
- **December 2019 Management**
When adding a license to several files using the **Manage license** link, a message now appears if you have not selected the files to which you want to apply the license. Previously, no message appeared.
- **December 2019 Management**
When you add access rights (on the asset level) using the embargo option, a message now appears (when saving the asset) if you did not specify a date. Previously, you could select embargo without a date; this was fixed.
- **December 2019 Management**
Funding information was not published correctly to Primo. This was fixed.
- **November 2019 Management**
While adding a PMID identifier to an asset, the validation did not work as expected. This was fixed.
- **November 2019 Management**
Group author was not editable on an asset form. This was fixed.
- **November 2019 Management**
The order of the author names on the asset brief results on the Asset Management page was not the same as the order of the authors on the asset form. This was fixed.
- **November 2019 Management**
Journal title look-up on the asset form in the research repository did not always find the results on the first try. This was fixed.
- **November 2019 Management**
When author matching is done, the owner of the asset can change locations on the authors order according to the authors list matched to the asset.
- **November 2019 Management**
Look-up for a ANZSRC research topic based on an ANZSRC numeric code did not always work. This was fixed.
- **November 2019 Management**
Asset search on the research repository according to a DOI was case sensitive. This was fixed.
- **November 2019 Management**
Keywords facet in the Assets Management page was case sensitive. This was fixed.
- **November 2019 Management**
ETD author was not shown under the creator MD field in the Viewer. This was fixed.
- **November 2019 Management**
When editing a researcher name on an asset, the order of the field names to edit was not correct. This was fixed.
- **September 2019 Management**
The success message for changing an asset type did not contain any information about the asset. This was fixed.
- **September 2019 Management**
File types were not sorted. This was fixed.
- **September 2019 Management**
When adding a staff-mediated asset, when pressing ENTER instead of selecting NEXT, the buttons at the top of the page change to the buttons of the next page, but the user remained on the first page. This was fixed.
- **September 2019 Management**

There were some issues with the external ETD form. These were fixed.

- **September 2019 Management**

There was a time zone issue when saving a date. This was fixed.

- **September 2019 Discovery**

In Primo VE, a long file name did not appear correctly, This was fixed.

- **September 2019 Management**

ANZ facets appeared as codes instead of values. This was fixed.

- **September 2019 Management**

External affiliations of non-affiliated researchers added as grant investigators did not appear in the asset page. This was fixed.

- **July 2019 Management**

Commas could not be used in Additional Subjects. This was fixed.

- **July 2019 Management**

Incorrect link and file types were available for asset types that did not have their own forms. This was fixed.

- **July 2019 Management**

When importing an asset, commas were removed from the place of publication. This was fixed.
