

## Reinstall or reconfigure ODBC for Voyager after an upgrade

- **Product:** Voyager
  - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
- 

### Question

We are about to upgrade Voyager. Do we need to reinstall or reconfigure ODBC for Voyager on staff workstations running Prepackaged Reports?

### Answer

The likely answer to this question is "No."

The Oracle ODBC 10g drivers for Access 32-bit currently pertain to all supported versions of Voyager.

You *will* need to [Relink your Access tables](#) after an upgrade.

### Additional Information

See: [Are there separate Voyager Oracle ODBC drivers for Access 32-bit and Access 64-bit?](#)
