

Installing Voyager clients on a Macintosh

- **Product:** Voyager
 - **Product Version:** 8
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Question

Can the Voyager clients be installed on a Macintosh?

Answer

Running the Voyager clients on a Macintosh is not supported, as per the "Supported PC Operating Systems" section of [Supported Software and PC Requirements](#).

Additional Information

You might want to check with the Voyager Customer Listserv to see if any of your colleagues have done this. See: [Customer Listserv](#).
