## Embedded Search

This page is intended only for users who have administrative permissions.

You can create an embedded search code snippet to embed live Pivot-RP results within an iframe on a Web page. Once the code is added to the Web page, Pivot-RP displays different levels of information within the iframe, depending on whether the user is authenticated.

For more information on working with iFrames, see [Working with iFrames](#).

---

## Creating an Embedded Search

You create embedded search code snippet on the Create an Embedded Search page (**Admin > Tools > Embedded Searches > Create an Embedded Search**).

The screenshot shows the 'Create an Embedded Search' form within a web application. The top navigation bar includes 'Reports', 'Institutional Settings', 'Groups', 'Education & Training', 'Statistics', 'Tools', and 'Manage Gallery'. The form title is 'Create an Embedded Search' with a 'Manage Embedded Searches' link. The instructions state: 'Use this form to create an iframe html snippet that you can embed on your organizations website.' The form is divided into five steps: Step 1: 'Name Your Embedded Search' with a text input field containing 'General Name 1' and a note: 'This name will display for your users inside the iframe on whichever webpage you embed it.' Step 2: 'Choose Funding Opps to Share' with a dropdown menu showing 'Select a Curated List or Curated Search to embed'. Step 3: 'Pick the Sort Order for Results Display' with radio button options: 'Title' (selected), 'Sponsor name', 'Deadline' (with sub-option 'soonest > latest'), and 'Amount' (with sub-option 'highest > lowest'). Step 4: 'Add Co-owners (optional)' with a section for 'Co-owners: (1)'. Step 5: 'Save Embedded Search' with 'Save' and 'Reset' buttons.

### Creating an Embedded Search

---

#### Note

The Relevance Sort Order option is available only when embedding Curated Searches.

---

Follow the on-screen text to create the embedded search code snippet. After you select **Save**, Pivot-RP displays the iFrame code snippet to embed in your Web page. A preview of the embedded search as it will appear on your Web page is displayed.

Manage Embedded Searches

Below is a working example of what "New Opps" will look like when embedded on your webpage. Use the html code snippet highlighted to embed the iframe widget so the Pivot-RP results (example below) will display within your institution's webpage

The funding opportunities in the iframe are responsive, but you can control the dimensions and appearance of the iframe itself. Tips and information on working with iframes can be found in our knowledge center.

```
<iframe width='560' height='800' src='https://pivot.proquest.com/embedded/0b9326465d40435c8abff2f1552f7976' frameborder='0' title='Funding from Pivot-RP'></iframe>
```

## Manage Embedded Searches

Select an embedded search title to display the embedded code snippet and its preview page.

For your embedded searches only, you can also select the following row actions:

- **Edit** – Select this action to modify your embedded search. You can change any of the parameters, such as Funding

Opportunities to Share. After saving changes, the original code snippet for this embedded search does not change. This means that saved changes are automatically reflected in real time on any Web page where the code for this search was already embedded.

- **Delete** – Select this action to delete an embedded search that is no longer needed. It is recommended that you remove the code snippet from the Web pages on which it is embedded.
