
Modify Voyager WebVoyage charged item renewal message text

- **Product:** Voyager
 - **Product Version:** 8
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Question

How to modify the message text that displays in the WebVoyage OPAC when a patron renews a charged item.

Answer

These messages are configured in the webvoyage.properties file. See this stanza (remember to backup the file before making any changes):

```
#=====  
# MyAccount page charged item renewal message.  
# This message is displayed only after the renewal of item or items is performed  
#=====  
page.myAccount.chargedItem.item.renewMsg.success=All items are renewed successfully  
page.myAccount.chargedItem.item.renewMsg.fail=One or more items failed to renew (Please  
see status below for detail)  
page.myAccount.chargedItem.item.renewMsg.noItemsSelected=No items are selected for  
renewal.  
#=====
```
