

Due date for borrowing resource sharing requests

- **Product:** Alma
-

Description

When receiving a borrowing resource sharing item, the due date as defined in the terms of use is not used.

Resolution

It is possible to define a due date in the loan terms of use on the level of the resource sharing library.

However, you can also manually enter a due date when receiving a resource sharing item. This manually entered due date will overwrite the due date from the terms of use which is not used anymore then. If you want the due date from the terms of use to be used, leave the due date field in the resource sharing receiving form empty.
