December 2026	November 22, 2026	December 6, 2026	-	Resolved Issues Analytics		

### Note

Alma Feature Releases include a Release Update one week after the Production release. The Release Update contains resolved issues.

The Release Update takes place on both the sandbox and production environments.

### Note

Semi-annual indexing starts at the beginning of the January and July releases, and ends during the month (it tends to change from customer to customer). It includes indexing only, i.e. doesn't trigger the execution of Recalculate OPR and Recalculate DEDUP/FRBR. Customers can see the progress indication from the Monitor Jobs page, either from the Running or History tabs, depending on the status. Due to the sensitivity of the process, the development team triggers the indexing in all data centers.

## Maintenance Schedule

Date	Activity	Data Center	Impacted Environments	Estimated Downtime (UTC)
July 12-13, 2025	Frankfurt DC06 data center migration	Frankfurt DC06	<ul style="list-style-type: none"> <li>• Alma EU03</li> <li>• Alma EU04</li> <li>• Alma EU05</li> <li>• Alma EU06</li> <li>• Esploro EU03</li> <li>• Esploro EU04</li> <li>• Leganto EU03</li> <li>• Leganto EU04</li> <li>• Leganto EU05</li> <li>• Leganto EU06</li> <li>• Primo VE EU03</li> <li>• Primo VE EU04</li> <li>• Primo VE EU05</li> <li>• Primo VE EU06</li> <li>• Rapido EU03</li> <li>• Rapido EU04</li> <li>• Rapido EU05</li> <li>• Rialto EU03</li> <li>• Rialto EU04</li> </ul>	<p>Saturday, July 12 07:00 CEST – Sunday, July 13 07:00 CEST</p> <p>(Central European Summer Time, UTC +02:00)</p>
