
No results in WTI for exact title beginning with article

- **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
 - **Relevant for Installation Type:** Dedicated-Direct, Direct, Local, Total Care
-

Description

For two records, we have no results if searching the full title with the title index (WTI) in the GUI:

XXX01 032155254 :

WTI=Le grand livre de la supervision

and 032069963 :

WTI=Lexique de comptabilité

Records not found.

But I can find them using these queries:

Using quotes :

WTI="Le grand livre de la supervision"

WTI="Lexique de comptabilité"

Or without "le/la/de" :

WTI=grand livre supervision

WTI=Lexique comptabilité

Resolution

Though the cause of this was not found, they were able to correct it by deleting and rebuilding the words for those two documents (via util/f/1/17). (This utility deletes and rebuild the words -- unlike util/f/1/13 which does not delete the words.)
