

What Character Set is used by Voyager Self Check?

- **Product:** Voyager
 - **Product Version:** 7+
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Question

What character set is used by Voyager Self Check when communicating using SIP2? Is Voyager Self Check Compatible with UTF-8?

Answer

Voyager Self Check communicates with automated circulation systems (ACS) using ASCII, as is defined in the SIP2 standard. Voyager does not possess any functionality to support the use of alternative character sets such as UTF-8 within messages between Voyager Self-Check and the ACS.
