

RSS Publishing Profile has "alma:" in the XML

- **Product:** Alma
-

Question

Publishing an RSS Web feed for new items from Alma has XML values such as: <alma:link> <alma:language> <alma:format> <alma:matttype>. It appears that the alma: text in a number of the tags is throwing off the display, so those fields/links aren't displaying in the feed.

Answer

The Alma library shared the solution - uncheck the 'RSS version 2.0' box under RSS Feed Parameters in the Publishing Profile, and republish.
