Presentation Date

- December 5, 2019

Description

- Course Loader was introduced to Alma and Leganto in December of 2015. Many sites have never performed a cleanup on their courses in Alma by purging courses that have no usage, no reading lists, or are outside of a certain retention period. This presentation covers different methods customers use for course cleanup in Alma, from basics to API-enabled workflows.

Presenters

- Greg Argo, University of St. Thomas
- Peta Hopkins, Bond University
- Jamen McGranahan, Vanderbilt University
- Yuan Zhong, University of New South Wales

Materials

- Alma Analytics path for shared reports referred to in the presentation:
