

## Can auto recall be configured to only issue recalls for loans with holds

- **Product:** Alma
- 

### Question

Is it possible to configure auto-recall so that the system automatically recalls loans when they have a hold placed on them, but does not issue recalls when the item is overdue for a set amount of days?

### Answer

When auto-recall is enabled, all forms of recall are enabled. This means that an institution cannot select which types it wants to use and turn off the others.

### Additional Information

See [https://knowledge.exlibrisgroup.com/...erdue\\_Handling](https://knowledge.exlibrisgroup.com/...erdue_Handling) for more information.
