
Surveys

Overview

The Surveys product integration allows student to review active surveys that are assigned to them.

Vendors

The Surveys product integration is supported by EvaSys.

User Experience

The following section describes information relating to the user experience for the Surveys product integration.

User Activities

- View the number of active surveys as a live tile.
 - View a list of active surveys that are assigned to the user with a link to the surveys page to allow the user to fill out the surveys.
-

Authentication

The Username and password are configured as part of the Vendor's Authentication API configuration section and are sent as a header in the service call.

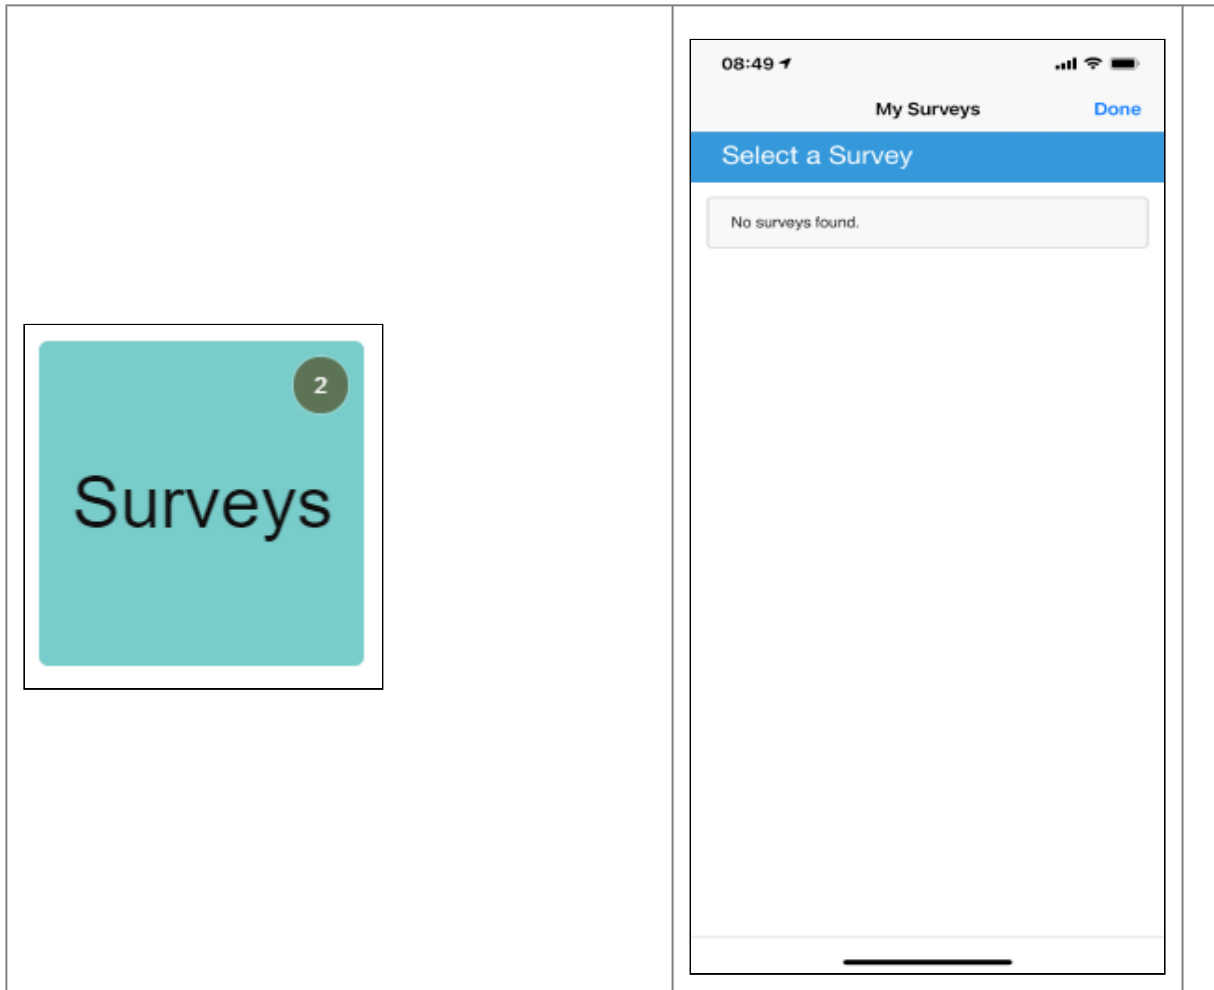

Offline Support

None. Users must be online to retrieve their survey data.

Screenshots

The following is an overview of the Surveys product integration user interface for a reference when configuring it:

Technical Overview

The Surveys product integration is supported by EvaSys.

- The EvaSys API URL is same for all customers: https://evasysplus.co.uk/domains/{CUSTOMER_ID}/participant-surveys?email={USER_EMAIL}
- The email needs to be set as a URL Query parameter. This is configured in the User Input Identifier section.
- EvaSys passes the customer ID as a URL path parameter. This is configured in the API Configuration section.

Configuration

The following section describes configurations for the Surveys product integration. Note that while the vast majority of these fields are not mandatory, they are displayed with their default values, unless otherwise stated.
