

How can I review Alma API calls via server logs?

- **Product:** Alma

Description

I need to review the detailed log files for my API. Is there a way I can do this?

Resolution

Yes. You may set up a report that will provide you with the API history. To do this go to <https://developers.exlibrisgroup.com/manage/keys/> and edit any API-key

Then, after 1-2 days you should see the log files in <https://developers.exlibrisgroup.com/manage/reports/> under the history tab.
