

Marcexport exclude file does not exclude MFHD locations

- **Product:** Voyager
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Question

Marcexport (Pmarcexport) exclude file does not exclude MFHD locations.

Answer

This is by design. The Bulk Export -X parameter's exclude file excludes records from being exported based on certain *cataloging locations*. It does not exclude records based on MFHD locations.

See Chapter 11 of the [Technical User's Guide](#) for more information.
