

## 856 Links in Alma BIB don't display in Primo

- **Product:** Alma
- 

### Problem

Links for finding aids, etc, display and work however, 856s aren't displaying in Primo.

This is a physical (only) record and not part of a P2E migration (i.e. no portfolios attached).

For example:

785 |t Burnt Swamp Baptist Association.

856 |3 1996-2000 |u [https://archive.org/details/annualofburntswa01burn\\_2](https://archive.org/details/annualofburntswa01burn_2) |z Access electronic version here.

856 |3 2001-2002 |u [https://archive.org/details/annualofburntswa00burn\\_0](https://archive.org/details/annualofburntswa00burn_0) |z Access electronic version here.

### Resolution

This is an 856 MARC indicator issue.

At least one indicator of 1 of 4 is needed for these to appear in Primo.

Change the 856 the indicators to 40 instead of 'blank blank' will enable these links to display in Primo.

### Additional Information

Alternatively, you could generate portfolios for these 856 links; but changing the indicators via norm rules will be easier.
