

Voyager to Alma Migration Query: Identify Department Codes that are Duplicates

Created By: Laura Guy (contact)
Created on: 10/12/2020

When migrating from Voyager to Alma, you may need to identify, review and resolve any duplicate (non-unique) Department Codes. See the Voyager To Alma Migration Guide for additional help on how non-unique Department Codes are migrated, or discuss this with your migration team.

This query, which you can run using Voyager Prepackaged Access Reports, can help you identify duplicate Department Codes.

```
SELECT DEPARTMENT.DEPARTMENT_CODE, Count(DEPARTMENT.DEPARTMENT_ID) AS  
CountOfDEPARTMENT_ID  
FROM DEPARTMENT  
WHERE (((DEPARTMENT.DEPARTMENT_CODE) Is Not Null))  
GROUP BY DEPARTMENT.DEPARTMENT_CODE  
HAVING (((Count(DEPARTMENT.DEPARTMENT_ID))>1));
```

For other queries that may be useful, see my "Surviving Almanado: tips for a successful pre-implementation" presentation's [Accompanying Materials](#).

Posted as is. If you need assistance in running custom SQL queries in Prepackaged Access Reports, consult the Voyager Customer Listserv.
