
Voyager to Alma Migration Query: Identify Duplicate Course Numbers

Created By: Laura Guy (contact)
Created on: 10/12/2020

When migrating from Voyager to Alma, you may need to identify, review and resolve any duplicate (non-unique) Course Numbers. See the Voyager To Alma Migration Guide for additional help on how non-unique Course Numbers are migrated, or discuss this with your migration team.

This query, which you can run using Voyager Prepackaged Access Reports, can help you identify duplicate Course Numbers.

```
SELECT COURSE.COURSE_NUMBER, Count(COURSE.COURSE_ID) AS CountOfCOURSE_ID
FROM COURSE
WHERE (((COURSE.COURSE_NUMBER) Is Not Null))
GROUP BY COURSE.COURSE_NUMBER
HAVING (((Count(COURSE.COURSE_ID))>1));
```

For other queries that may be useful, see my "Surviving Almanado: tips for a successful pre-implementation" presentation's [Accompanying Materials](#).

Posted as is. If you need assistance in running custom SQL queries in Prepackaged Access Reports, consult the Voyager Customer Listserv.
