
Primo VE 2020 Known Issues

The following table lists the known issues for new features in the Primo 2020 release.

Category	Issue	Release
Accessibility	When using the keyboard to access drop-down menus, no indication is given when a menu is accessed.	December 2020
Accessibility	When using the keyboard to place focus on a drop-down list that does not have a default value (such as the Sort by option in My Library Card), the list will appear empty unless a value was selected previously.	November 2020
Accessibility	Users are unable to navigate the main menu and send-to actions using the tab key. Until an issue with AngularJS is resolved, users will need to use the arrow keys for these types of navigation.	November 2020
