

Add MFHD keyword search to WebVoyage Basic Search

- **Product:** Voyager
 - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
-

Question

How to set up OPAC MFHD Keyword searching in the Basic Search tab.

Answer

Add the HKEY^ index to the "Search Basic" section of your Tomcat skin's webvoyage.properties file.

For example:

```
page.search.basic.search.code.MFHDKEYWORD=  
page.search.basic.search.code.MFHDKEYWORD.code=HKEY^  
page.search.basic.search.code.MFHDKEYWORD.order=14  
page.search.basic.search.code.MFHDKEYWORD.display=MFHD Keyword
```

Additional Information

Enter a caret (^) after an index code to insert an AND operator between the strings in a search.
