

## Can't see all portfolios in "View It"

- **Product: Alma**
- 

### Description

We can see only 25 portfolios in the "View It" tab although there are more than that. We can't see what is different in those missing portfolios.

### Resolution

There is nothing unusual in these portfolios. There is just a limit of 25 portfolios that can be displayed in "View It".

You can disable this limit as follows:

Configuration > Resources > Other Settings > `enable_view_it_show_all_results = true`

Note that the limit exists in order to improve performance, so disabling the limit may have an undesired effect.
