## When are search counts in the Voyager SEARCHPARAM table updated?

- **Product:** Voyager
  - **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare
- 

### Question

When are search counts updated in the [SEARCHPARAM table](#)?

### Answer

The search counts are updated once the session is ended.

### Additional Information

You can test this yourself. For example, look at the CATCOUNT for a search. Log into Cataloging, do that search. Close the Cataloging client. Then look at the count again. It should be higher.
