## How to force users to logout?

In this article, you will find how to force a user to logout. Force Logout is helpful for initiating an app update, upgrade, or troubleshooting.

---

### Goal

In this article, you will find how to force a user to logout.

Force Logout is helpful for initiating an app update, upgrade, or troubleshooting.

After completing this how-to, the user will have to re-enter his credentials in order to use the CampusM app.

---

### First Step

Open App Manager Settings and click on 'Force Logout', under the 'User Management' title, in the settings menu.

---

### Second Step

Choose one of the options:

▼ App Manager App Settings Force Logout

- All
- Roles
- Email Addresses

Save

- All - to force all app users to logout.
- Roles - a dropdown will open, choose a role to Force Logout of users who have a specific role.
- Email Addresses - Add email addresses of the users you want to force them to logout.
  - In order to force multiple addresses logout- add a comma between the addresses.

Click on 'save'. You will get a message about whether the action succeeded or not.
