

Block display of Personal Information in Voyager OPAC

- **Product:** Voyager
- **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare

Question

How do we block personal information from displaying in the Tomcat Voyager WebVoyage OPAC My Account screen?

Answer

The easiest way to do this is to remove the Personal Information link by commenting out the Personal Info Link section of the myAccountLinks.xml file:

```
<!-- ##### Personal Info Link ##### -->
<!-- <xsl:if test="$displayType != 'personalinfo'">
<xsl:for-each
select="/page:page//page:element[@nameId='page.myAccount.viewPersonalInfo.link']">
<li>
<a class="btnltbluelink" href="{page:URL}"><span><xsl:value-of select="page:linkText
"/></span></a>
</li>
</xsl:for-each>
</xsl:if>
-->
```

This file is found in the .../ui/<skin>/xsl/pageFacets directory.

Additional Information

If you want to take a more granular approach, replace the information inside the appropriate <div> tag in the .../xsl/contentLayout/cl_personalInfo.xml file with a message of your choice.

For example to remove the Permanent Address from the Personal Info display and replace it with "Removed Due to Security Concerns", change this:

```
<div id="dataPermanentAddress">
  <xsl:call-template name="buildAddressData">
    <xsl:with-param name="eleName"
select="'page.myAccount.viewPersonalInfo.permanentAddress'"/>
  </xsl:call-template>
</div>
```

To this:

```
<div id="dataPermanentAddress">  
Removed Due to Security Concerns.  
</div>
```
