

Alma Roadmap Highlights - July 2021

Overview

The Alma roadmap is important for Ex Libris as a means to communicate the key Alma priorities with the Alma community.

We take pride in the fact that this roadmap was built together with the Alma community and is based on the community's future strategy for libraries / academic institutions.

As we all continue to face global challenges, we also make sure to update the roadmap accordingly.

Up until now, the roadmap focused on our efforts in remote Library management, digital and electronic resources, and student engagement.

Going forward our roadmap places focus on customer satisfaction. Many of our existing and future Alma developments deal with simplified workflows, improved performance, UX enhancements and more. All based on the feedback given by the Alma community.

The Alma roadmap gives you a two year future view of the product and the key areas of emphasis.

 Metadata Management	 Electronic Resource Management	 Digital Resource Management
 Physical Resource Management	 Acquisitions	 Fulfillment and Resource Sharing
