

Duplicate fulfillment units will not copy all fulfillment unit rules

- **Product: Alma**
-

Description

In the actions menu of a fulfillment unit there is the option "Duplicate".

When duplicating a fulfillment unit, only some of the fulfillment unit rules are copied over to the new unit.

Resolution

When you duplicate a fulfillment unit, the new unit will be a replication of the old one with some exceptions:

- Locations are not copied to the new unit; a location must be assigned to one fulfillment unit only, so it can't be copied to the new unit; for this reason the Locations tab remains empty.
- Only those rules are copied that are not based on the "Location" as input parameter; this is a logical consequence, as the locations are not used in the new fulfillment unit.
