
Managing Notification Groups

[Click to play](#)

Duration: 04:11 min.

Description	Notification Groups allow you to send notifications to many users at once. In this session, we'll show how to manage Notification Groups, including: categorizing groups, creating new groups, adding subscribers to a group by enabling self-subscription, adding subscribers by bulk selection, and adding subscribers by user role.	Attachments Handout
Target Audience	New and existing customers with responsibility for managing/maintaining their campusM instance.	
Prerequisites	None
