

How to export and import a Creative Studio entity?

How to manually export/import creative studio pages.

This manual instructs how to export a Creative Studio page from one menu to another one, or between the app environments.

To manually export/import creative studio pages:

1. Go to Creative Studio page in the App Manager.
2. Choose the code editor in the top right panel.
3. Choose export from top right panel - this will download a file with the .cmcs ending.
4. Go to other apps creative studio.
5. Create new page.
6. Choose import from the top right panel.
7. Add the file from #3.
