
Configuring Your Portal View

[Click to play](#)

Duration: 3:22 min.

Description	campusM can function as a student portal when viewed on the web. Portal functionality includes a side navigation bar with links to the menu services of your choice. When you open any menu service, it displays fully and exclusively in the main panel, and there is a breadcrumb trail for your orientation and backtracking. The portal view is configured via App Builder.	Attachments Handout
Target Audience	New and existing customers with responsibility for managing/maintaining their campusM instance.	
Prerequisites	None
