

What is Pmarcdump in the Voyager server's /sbin directory?

- **Product:** Voyager
- **Relevant for Installation Type:** Multi-Tenant Direct, Dedicated-Direct, Local, TotalCare

Question

What is Pmarcdump in the Voyager server's /sbin directory?

Answer

Pmarcdump displays the binary MARC file as text, one field per line. This is similar to running MarcEdit > MarcBreaker on the MARC record.

Example of usage which saves results to a file:

```
/m1/voyager/XXXDB/sbin/Pmarcdump /full/path/to/file.mrc > file.txt
```

Example output:

```
[VGER] voyager@us-voysupxxx01 : sbin/ $ Pmarcdump /m1/voyager/voy1030db/rpt/music.mrc
